mSpy Can Do It All

The Best Way to Monitor Your Cell Phone or Tablet

mSpy is the most popular and user-friendly application for watching over your kids, preventing theft, and supervising your employees' performance. Our mobile monitoring software runs invisibly on the target device to track all activity including; call log history, GPS location, calendar updates, text messages, emails, web history, and much more! After following our easy, step by step instructions on how to create your own personal online mSpy account, you may log in to immediately begin viewing the tracked data.

Manage Calls mSpy allows you to view all incoming/outgoing calls with their duration and timestamp.
Find out more by clicking on the following features: Call LogsIncoming Calls Restriction

Track text messages This cell phone tracking software lets you read all text and multimedia messages sent or received by the target phone user. They are made viewable to you regardless of if they have been deleted on the tracked device itself.

Find out more by clicking on the following feature: Sent / Received text messages

I've been using mSpy for about a month now and it has been a great experience! I am a protective but extremely busy father to a 12 year old daughter. I feel guilty for not being around enough but mSpy has allowed me to bridge that gap. I now feel like I'm with her all the time.

I am a mother of two children and their safety is my primary concern. Now that they are living in the modern world and information is accessible through the internet, I want to filter the information that they come across everyday. It is well worth the cost of knowing that my 5 and 6 year old kids will not accidentally browse throughin appropriate website.
